

## UI Designer

This is a role for an individual who can work closely with the Clinical Engineering, UX Design, System Architecture and Visualization teams to implement versatile solutions to tricky front-end development problems, while keeping the end user in mind. While working in a challenging and fast paced work environment, this individual maintains strong coding skills, an unwavering commitment to quality and a strong desire to be a team player. This individual's work will have tremendous impact on the medical industry and will help shape the future of digital surgery.
